"Studies show we take in as much or more chemicals from showering as we do from drinking water." (Rutgers Univ.)

Whole House water filters offer quality water throughout the home.

All performance claims and pricing were taken from publicly available information. If you find information that is inaccurate, please send the correct info with supporting documentation to [info@belkraft.com](mailto:info@belkraft.com), and we will address any errors.

\* Pricing is subject to change and is accurate as of the date this chart was last updated.

\*\* Cost per gallon is calculated as replacement filter price/capacity.

† Not all contaminants will be listed in chart

Manufacturer data last updated 09/29/2011
